Swiss Deburring & Chamfering Equipment

Facette Star 500

Facette Star 500 Chamfering Machine

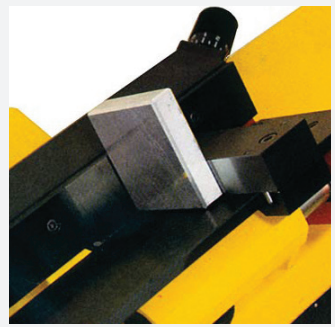

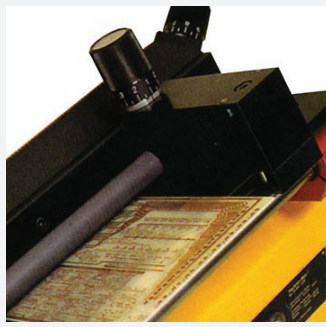

With sliding table and infinitely variable cutting speed

Save time, save money...

- To deburr and chamfer safely, efficiently without counter-burs, on single pieces or batch produced parts.
- Using it next to the production machine reduces extra time and thereby overall costs.
- The sliding table system eliminates scratches on the workpiece surfaces, the workpiece remains firm on the table by the ball bearings.
- The bearing system allows for uniform movement of workpieces up to 50kg (110lbs) across the cutter eliminating chatter and the need of repetitive operations.
- Milling of chamfers on workpieces of steel, stainless steel, non-ferrous metals, aluminium, plastic materials, hardwood, etc.
- An absolute necessity for the tool and die-maker, mould-maker, machinery builder, mechanical workshop, synthetic resin and electronic industry.

Features:

■ Hold down with pre-load to clamp thin material up to 5 mm (.2") thick p/n 923.500.300

■ Gauge to square small items (standard access) p/n 923.500.031
